

**Scotsman**<sup>®</sup>

ICE EXPERIENCES

ICE  
IS  
US

**MOFFAT**<sup>®</sup>

A hand holding a large, clear ice cube against a dark background with falling snow. The hand is positioned in the lower right quadrant, with the fingers gently cradling the ice. The snow is captured in motion, creating a sense of cold and freshness. The overall mood is clean, crisp, and professional.

Scotsman®

ICE  
IS  
US

Ice is our passion.  
It is at the heart  
of **everything** we do

Scotsman has focused single-mindedly on ice making technologies since the first day: over 60 years of enthusiasm and experience to be and remain the first and the best. Innovative by tradition.

### Scotsman EcoX

Scotsman is engaged in an important project to develop a new range of icemakers using only natural refrigerants, which are fully compliant with the F Gas Regulation and have almost ZERO Ozone Depletion Potential and Global Warming Potential.

### XSafe

Scotsman ice machines feature the all-natural sanitation system. Resulting in protection from viruses and bacterium, preventing formation of slime, mould and yeast, operating behind the scenes 24/7 365 days to keep equipment clean and safe.

# Ice and its shapes

## Gourmet Ice

Crystal clear, pure, hard and long-lasting ice cubes. Individually formed by spraying water onto a subcooled horizontal evaporator. Its fast cooling action and slow dilution make drinks chilled for a long time. Available in three different sizes and weights to meet any requirement in terms of ease of use and quality results.

## Dice Ice

Classic six sides ice cube. Its greater surface for heat exchange allows a fast chilling of all drinks. The vertical evaporator technology of this ice cube guarantees large ice production at lower operating costs. Available in several different sizes, it is highly appreciated in QSR and coffee chains applications.

## Nugget & Cubelet Ice

Compressed flake ice available in two different types: Nugget, regular micro-cubes and Cubelet, irregular chips. Nugget & Cubelet are suitable for multiple uses and are the fastest moving ice-type in QSR applications in the last few years. Excellent when used with carbonated drinks as well as smoothies and perfect for food and plates display. Long lasting, easy to use, high and fast displacement and hands-free dispensing: no wonder this type of ice is so successful!

## Flake Ice

Ice in its most natural shape, it is made at a temperature just below zero degrees Celsius. Highly versatile and suitable for multiple applications: fish display counters, buffet display, frozen drinks preparation as well as fast chilling of wine & champagne buckets. It comes in two different variations: Flake with 25% residual water content and Super Flake with 15% residual water content.

## Scale Ice

With less than 2% residual water content, it's very dry and it's the coldest form of ice. It's made by irregular fragments of ice with a variable thickness that can be adjusted between 1 to 2mm. Ideal for industrial processes, for fish and sea-food display and perishable goods transportation, as well as to optimize dough temperature. Versatile, moulding to any shape, melts at a slow and regular rate to keep food at maximum freshness.

# Gourmet cube - EC/MXG Series

# Scotsman®

Small gourmet cube - 8 g,  
21mm dia x H 25mm

Medium gourmet cube - 20 g,  
30mm dia x H 34mm

Large gourmet cube - 39 g,  
38mm dia x H 41mm
